# TOA

SP-11N
900 Series SIP Module

Looking for a PA/paging system connection to your VOIP/SIP phone system?

Features:

- The SP-11N is a VoIP phone paging module supported SIP (Session Initiation Protocol) with Auto-answer function.
- It can be connected with IP network and directly registered as one SIP phone station on various management software of SIP server.
- It also has VOX and mute functions designed for use with TOA's 9000M2, 900, 700 and BG series amplifiers.
- 5 contact ouputs can be activated by keypad operation on any phone in the system for paging zone selections, or triggering pre-recorded messages.
